

1. Ajeet

Program Name: Ajeet.java

Input File: None

Ajeet is making travel arrangements for his Leaguetown HS CompSci Team to go to Austin for the State UIL Meet in May 2024. To do this, he needs a calendar of May 2024.

Your job is to display the calendar for him. It should look exactly as shown below.

Input: None

Output: Duplicate the calendar exactly as shown below. Make sure to include the line below the month consisting of the six sets of digits 0-9.

Sample input: None

Sample output:

```

                                MAY 2024
01234567890123456789012345678901234567890123456789
  SUN      MON      TUE      WED      THR      FRI      SAT
    5        6        7        1        2        3        4
   12       13       14       8        9       10       11
   19       20       21      15       16       17       18
   26       27       28      22      23       24       25
   26       27       28      29      30       31

```
