

1. Adrian

Program Name: Adrian.java

Input File: None

Adrian is always amused when he sees the classic “Hello World” program! He wonders how many different programming languages have used that program as the first program for students learning the language. From his research he has come up with an initial list of programming languages as shown below. Believe it or not, he even found a COBOL example!

Input: None

Output: Display the following exactly as shown below.

Sample input: None

Sample output:

JAVA
PYTHON
SWIFT
ADA
C
C++
COBOL
FORTRAN
ALGOL
BASIC
DELPHI
PASCAL
PL1
JAVASCRIPT
