

## 1. Andrei

**Program Name:** Andrei.java

**Input File:** None

Andrei really enjoys working with prime numbers. He appreciates their characteristics and their importance to all manners of mathematics. In fact, on his wall he has the following chart in which the first 25 prime numbers are separated by their tens digit.

Your job is to duplicate that chart.

**Input:**

None

**Output:**

A list of the first 25 prime numbers separated into "tens."

**Sample input:**

None

**Sample output:**

```
2 3 5 7
11 13 17 19
23 29
31 37
41 43 47
53 59
61 67
71 73 79
83 89
97
```
